Mr. William F. Caton  
Secretary  
Federal Communications Commission  
1919 M Street, NW Room 222  
Washington, D.C. 20554

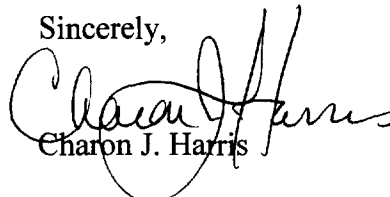

**EX PARTE: Implementation of the Pay Telephone Reclassification and  
Compensation Provisions of the Telecommunications Act of 1996  
(CC Docket No. 96-128)**

Dear Mr. Caton:

Yesterday representatives of GTE Service Corp. and GTE Telephone Operations met with John Muleta, Bob Spangler, and Michael Carowitz of the Common Carrier Bureau's Enforcement Division to discuss the status of GTE's compliance with the FCC's rules in the captioned docket. GTE used the attached presentation to facilitate the discussion. In accordance with Section 1.1206(b)(2) of the Commission's Rules, an original and one copy of this notice are being filed with the Secretary of the FCC.

Please let me know if you have any questions.

Sincerely,

Charon J. Harris

## **Existing Intrastate Tariffs and Paragraph 142 of the Report and Order**

Paragraph 142 says, "LEC payphones must be treated as unregulated, detariffed CPE in order to ensure that no subsidies are provided from basic exchange and exchange access revenues or access charge payphone elements as required by the Act."

Some state commissions (Michigan and Illinois) have refused to let GTE withdraw existing tariffs pertaining to Public Coin and Semi-Public Coin services. Can the new basic payphone service tariffs mandated by the FCC's Order co-exist with current regulated tariff offerings that contain CPE that the FCC has detariffed?

## **Compensation for 0+ Calls**

Paragraph 53 of the Report and Order concludes that the Commission "... need not provide for compensation for 0+ calls, because independent payphone providers and non-BOC LECs receive compensation through individual contracts with the payphone's presubscribed IXC." Later in the same paragraph the Commission says, "... once the BOCs reclassify their payphones and terminate all subsidies, pursuant to Section 276(b)(1)(B), they may receive the per-call compensation established by this Order, so long as they do not otherwise receive compensation for use of their payphones in originating 0+ calls."

The BOC compensation is supported by the fact that because Section 276(b)(3) expressly grandfathers contracts existing before the date of the statute's enactment between location providers and the presubscribed carrier on many BOC payphones, the BOCs would not otherwise receive any compensation for 0+ calls. To ensure fair compensation for such calls the Commission has granted compensation for 0+ calls as stated above.

GTE maintains it is similarly situated concerning 0+ calls and is entitled to the same compensation granted to the BOCs.

## **Dialing Parity**

Paragraph 292 and Footnote 941 of the Report and Order detail the requirement for dialing parity for payphones. The footnote requires all LECs, other than BOCs, that are either already offering or plan to begin to provide in-region, interLATA or in-region, interstate toll service before August 8, 1997, to implement toll dialing parity by August 8, 1997.

GTE believes the August 8, 1997 date is applicable to its payphones for both interLATA and intraLATA dialing parity for its payphones. Currently, provision of interLATA dialing parity involves splitting 1+ and 0+ traffic between two different interLATA IXCs. GTE is not sure that such a mode of operation can be duplicated on an intraLATA basis. An intraLATA IXC must be willing to accept both 1+ and 0+ traffic in order for GTE to offer intraLATA payphone dialing parity.

GTE is in process of investigating if there will be a need to request an extension of time to provision its switches to provide intraLATA dialing parity for payphones.

## **Provision of ANI Payphone Coding Digits**

Paragraph 64 of the Order on Reconsideration says, "Once per-call compensation becomes effective, we clarify that, to be eligible for such compensation, payphones will be required to transmit specific payphone coding digits as part of their ANI, which will assist in identifying them to compensation payors.

Each payphone must transmit coding digits that specifically identify it as a payphone, and not merely as a restricted line. We also clarify, pursuant to a request by MCI, that LECs must make available to PSPs, on a tariffed basis, such coding digits as a part of the ANI for each payphone."

GTE will provide such digits in the following manner:

For all "dumb" payphone basic service lines ANI digits "27" will be provided for all GTE and non-GTE payphones subscribing to this service.

For all "smart" payphone basic service lines ANI digits "07" will be provisioned for all GTE and non-GTE payphones subscribing to this service. In order to determine that this is a payphone for call compensation purposes, the IXC will have to interrogate GTE's Line Information Data base ("LIDB") through GTE's tariffed offering of Originating Line Screening ("OLS") service. The LIDB feature Originating Line Number Screening ("OLNS") will provide the necessary screening code information to determine that the line in question is a payphone.

Will IXCs or PSPs incur the expense of the LIDB query?
